

Share The Love & Live Stream Your Wedding

Woodpecker Films Live-streaming offers a unique way for those who can't celebrate with you to attend your wedding day from anywhere in the world. Using the latest studio software, cameras & audio equipment we live-stream your wedding ceremony either privately or publicly to those you love, in real time, as it happens. Simply provide guests with a secure link that we provide and guests can view on tablets, phones, laptops or smart tvs live as your service takes place and with unlimited number of guests watching at the same time.

The wedding video is streamed live over our own secure LTE connections which means we can stream from pretty much any location, whether that's a church, a hotel, rustic wedding barn or an outdoor ceremony. We typically start the live stream about ten minutes before the event begins and it's available to watch again immediately after streaming finishes.
